

SQF Certification for Specialty Packaging in Less Than Six Months

"We care for our clients' products like they're our own and we're proud to know we help to bring top quality, healthy products into homes nationally and worldwide."

Director of Sales and Marketing
SARAH FAISON

CHALLENGE

When a large client acquired an NBE infant nutrition and food maker company, Praxis was asked to expand our clean room capabilities to include food-grade primary and secondary packaging services – all on a compressed timeline for the upcoming launch of a toddler snack. Distribution of the product would be to multiple retailers nationwide and would require the securing of new equipment and, most importantly, full Safe Quality Food (SQF) certification.

SOLUTION

Praxis Director of Sales and Marketing Sarah Faison, then Business Development Manager, was tasked to lead the expansion. Faison and her team identified all needed equipment and began undergoing SQF's rigorous certification and training program. SQF food and safety quality codes meet all regulatory, industry and customer requirements for all sectors of the food supply chain from farm to retail and is recognized world-wide by agencies, providers, and retailers.

OUTCOME

In less than six months, Praxis secured multiple specialty packaging equipment lines, full SQF certification, and installed and validated the entire packaging line. The program launched successfully with over six million canisters of the toddler snack product for numerous retailers into the marketplace.

Contact us for more information on how we can help you with all your packaging needs at (616) 827-8525.

OUR CAPABILITIES

Primary Packaging:

- Solid Dose Bottling
- Solid Dose Blistering
- Single-Use Flexible Packaging
